## Education

The George Washington University, D.C.

Sep. 2015 - present

M.S. Computer Science

GPA 3.7

## Skills

Languages: Java, C++, Android

Database Systems: Oracle, Sqlite

## Project on Spare time

### Android Profile Assistance Application

2012

Application Link: [http://www.anzhi.com/soft\\_182703.html](http://www.anzhi.com/soft_182703.html)

- Design and develop an Android application to switch phone modes base on users' circumstances
- This application is a success for a leisure project, with 8000+ downloads in multiple App stores

### Vocabulary Memorizing Assistance

2013

- Design and develop an Android application to assist users to more efficiently memorize English words
- Functionality includes:
  1. Users log in
  2. Users can import customized vocabulary dictionary
  3. Allowing users to categorize words into Already-Remembered list and Frequently-Forgotten list
  4. Allowing users to add frequently forgotten words to widget. With this functionality, the phone will display words on the desktop without the application being active

## Working Experience

### Software Engineer (team leader) at Tencent Inc, Beijing, China

#### Android Field Application Engineer

Oct. 2011- May. 2014

- Working with an Android development team to design, implement, test and debug for Chinese most popular IM software – QQ, including QQ IM application, QQ Internet Browser, Tencent Micro-blog, Q-Zone and QQ Game on Android platform using Java
- Provide pre-installment for Samsung smart phones. Collaborate with Samsung providers, who has one of the most strict testing in the pre-installment field, to install QQ applications in the manufacturing process. Solve any bugs within 24 hours
- Train and instruct new colleagues to make them quickly involve in app development. Lead the team to the best FAE team

### Android Development Engineer at Peking University Founder Corp

#### Android Development Engineer

Jun. 2010- Sep.2011

- Design and program an Android comic reader with musical, visual and tactile sensory special effects
- Play a management role in the Android application development team

## Awards

- Tencent Annual Significant Business Breakthrough Award
- Tencent Business Division Breakthrough Award
- Tencent Department Instant Incentive Prize
